Base Price

\$624,900

3 Beds | 2 Baths | 1 Half Bath | 2 Garage

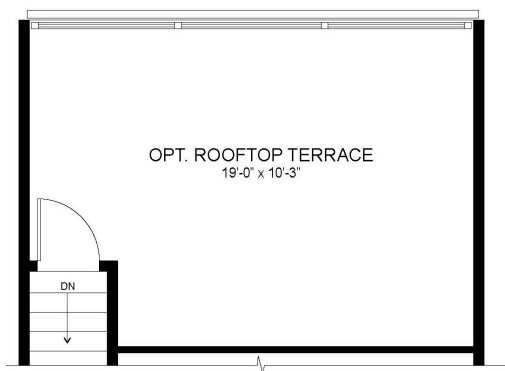

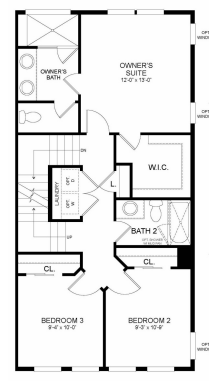

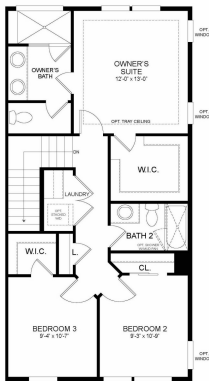

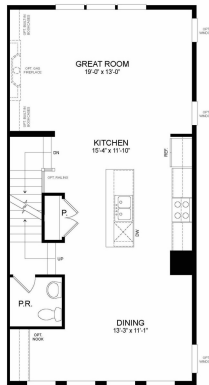

About This Plan

The Langston floor plan is built around what's truly important to you. Its central kitchen design puts you in the heart of the action, while its beautiful windows flood every space with the natural light you need to feel cozy and comfortable. Add a gas fireplace in the expansive great room to add even more warmth. The flexible spaces throughout each floor mean you can personalize the new design to your heart's content. Want to turn the third bedroom into a home office? Go for it. Want to add an additional full bath to the lower level? You can do that, too. The choice is yours, and it's always thoughtfully designed for you.
